

Minfos 4.2.4

Welcome to Minfos 4.2.4

This document provides an overview of the resolved issues in this Minfos release.

In this release:

- Completed orders can no longer be incorrectly merged in Order Maintenance
- CTG prompt is no longer displayed in Dispense when a script is ineligible

How to update Minfos

1. At any point in the day, download the latest Minfos software.
 - a. On the Minfos Launch Pad, click the **File** menu, and select **Minfos Net Terminal**.
The Minfos Net Terminal window is displayed.
 - b. Click the **Connect** menu, and select **1. Internet**. The Online Menu is displayed.
 - c. Check the **1 New Minfos Software** check box, then click **Okay**.
2. When you're finished trading for the day, ensure there are zero connections to your Minfos server.
Your Minfos software will update automatically, overnight.
3. Check that your Minfos software successfully updated. On the Minfos Launch Pad, click the **Help** menu, then click **About Minfos Software**.

The About Minfos Software window is displayed and shows your current Minfos version in the **Applications Versions** box.

Resolved issues

Stock Manager

- Previously in Order Maintenance, it was possible to perform a merge involving a completed order, e.g. merging a completed order with a created order. However, this resulted in incorrect order quantities. Minfos will now display the following prompt and prevent you from completing a merge with a completed order.

- The **Stock on Hand Report** is now capable of displaying large price values without issue
- Completing an order using the **Complete by Delivery** options now correctly updates the **Order Quantity** field

Dispense

- Scripts dispensed to a carer-assigned customer are now recorded to the correct carer
- Deleting Third Party Packing scripts with co-payment now refunds the correct amount
- Minfos no longer prompts to confirm whether a script is a CTG prescription when the script is not eligible, e.g. for a full price patient

Till

- Refunding products on promotion using **Cancel mode** now correctly uses and refunds the promotional price
