Release Notes

Minfos 4.2.5

Welcome to Minfos 4.2.5

This document provides an overview of the enhancements and resolved issues in this Minfos release.

How to update Minfos

1. At any point in the day, download the latest Minfos software.

   a. On the Minfos Launch Pad, click the **File** menu, and select **Minfos Net Terminal**.

      The Minfos Net Terminal window is displayed.

   b. Click the **Connect** menu, and select **1. Internet**. The Online Menu is displayed.

   c. Check the **1 New Minfos Software** check box, then click **Okay**.

2. When you're finished trading for the day, ensure there are zero connections to your Minfos server.

   Your Minfos software will update automatically, overnight.

3. Check that your Minfos software successfully updated. On the Minfos Launch Pad, click the **Help** menu, then click **About Minfos Software**.

   The About Minfos Software window is displayed and shows your current Minfos version in the **Applications Versions** box.

In this release

Enhancement

Changes to the way Minfos integrates with Guildcare

Some pharmacies have reported delays in the dispensing process when patient information is being sent to Guildcare.

Minfos may now display the following prompt at the end of the dispensing process to indicate the reason for the delay:

Note: If sending the patient information to Guildcare takes longer than 30 seconds, the process will be abandoned.
Resolved Issues

Dispense

- It is no longer possible to retrieve an **Owing Script** at the Till while it is being edited in Dispense. Selecting the script at the Till will display the following warning message.

- When a Repatriation patient reaches the Safety Net, the script that brings them to the threshold is now charged correctly.

Stock Manager

- It is no longer possible to merge items flagged as Drug in **Product Merges**. If a merge is attempted with a Drug as the slave product, the following warning message will display.

- Minfos no longer creates negative order quantities in **Order Maintenance** when the Stock On Hand quantity exceeds the Max Shelf Hold.

- The **Stock Variance Report** is now working correctly when **Show Detail** is not selected.
